PROFILE

Data Analyst with an end-to-end analytics and AWS cloud focus, specialising in SQL, Python, BI and data pipelines. Experience building ETL pipelines, data models and business dashboards, translating raw data into actionable KPIs, reporting and insights for stakeholders.

Hands-on experience with the AWS analytics stack (S3, Glue, Athena, Redshift, Lambda) to build scalable data pipelines, data lake architectures and reproducible analytics workflows, applying best practices in data quality, documentation, version control (Git) and data governance.

Analytical profile with an analytics engineering mindset, focused on self-service analytics, metric standardisation and bridging business, product and data teams to support data-driven decision making.
